EXPERIENCE

Tesla Inc.

Industrial Designer II, September - Present

Generated product concepts for over 25 vehicle accessories and energy products using Solidworks, Rhino, Keyshot and Unreal Engine. Provided cross-functional teams with functional and stylistic direction for 14 merchandise products.

Rivian Automotive

Industrial Design Intern, May - August 2022

Envisioned, presented, and developed human-centered vehicle charging and energy solutions from digital sketches, to Solidworks and Rhino CAD data, Keyshot renders and assisted engineering and design validation tests.

Dell Technologies

Design Intern, January - May 2019

Designed future computing experiences for XPS and Alienware. Developed charging accessories through sketches, CAD, and prototypes.

Fossil Group

Diesel Watch Design Intern, May - August 2018

Created new watch collections for the Diesel brand in flat Illustrator drawings and 3D models. Maintained close communication with overseas manufacturers and released 5 new SKUs of Mega Chief, Rasp and Armbar.

ArtCenter College of Design

Peer Coach & T.A., May 2017 - December 2022

Co-created and launched a coaching program that helps students complete design, drawing and 3D modeling assignments while guiding them towards a discovery of their unique styles as designers.

EDUCATION

ArtCenter College of Design, CA

M.S in Industrial Design, August 2022

B.S with Distinction in Product Design, August 2020
